

Building Community Resilience

Self • Family • Community • Earth

Unprecedented shifts are taking place in our economic, cultural and ecological systems.

Together we will explore a regenerative eco-social response to the converging challenges of the coming years.

This three-day course provides practical skills and resources through storytelling, hands-on workshops, community networking, and group experiential exercises.

You are invited to be part of a local movement to create highly resilient, adaptive, thriving community!

Weekend Course: September 26-29

To register contact calaurel@sover.net or 802-257-7916
